

How to Use Inspection and Parcel Map Preferences

Regarding “you are here”, the inspector shows up by default on the “View on Map” feature (aka parcel map, screen 1 and 2), and not the inspections map. To add the inspector to the inspections map, go to the Preferences, and check “Inspections Map” (screen 3).

By default the inspector is not included in the inspection map because of situations like in screen 2, where I am in Red Hook, NY, and the inspection is in Norwich. But the user can choose.
