

What's New in Municipity Mobile for Android™ v3.4.4?

So What's New?

The v3.4.4 release is an update that improves the ability for Municipity Android administrators to configure User Monitoring. Instead of simply turning the feature on and off, administrators can now turn on monitoring and set the **frequency** of the lat/lng updates sent to the cloud.

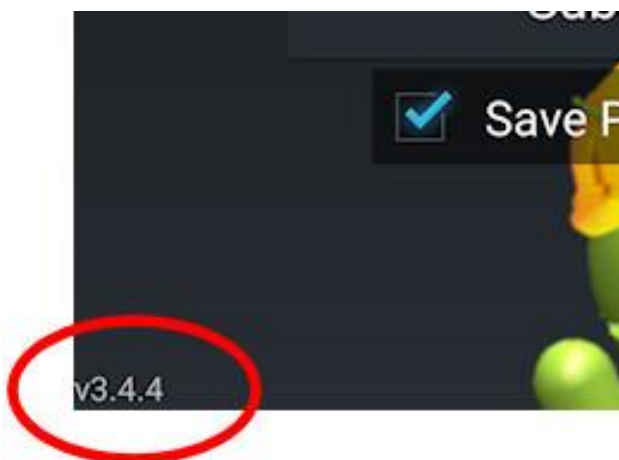

Note that frequent updates may result in the device's battery draining more quickly, so it is recommended that a frequency of *five minutes* or more be selected.

How to Update

OK, be sure that the 3.4.4 version of the Muncity Mobile for Android application is installed on your Android device. You may already be configured to download updates automatically. The version is located in the lower-left corner of the login page.

If not, simply download this latest version from [Google Play](#).

Enjoy,

The Muncity / SCA Team
